The first time I produced 'Hello World' in my console I knew I was hooked into the world of Web Development. But web development has always been more than 'just a job' for me, it's offered an engaging challenge to continually learn and improve my skills in creating high-quality applications. What started as a simple 'Hello Word' has become a full-fledged passion that only gets more exciting as days go by.

PROJECTS

Ecommerce Applcation

A fully functional Ecommerce site. Browse products while adding them to your cart and wishlist. Place orders while saving your personal information such as addresses and payment options.

- Full Stack Web Application
- Techs: MongoDB, Express, ReactJ, Node, Redux, Bootstrap

Expense Tracker

React bases project that tracks your expenses and incomes. Add and remove transactions, view chart that displays all expenses, and search your transactions.
